The **NOVASOL CHEMICALS GROUP** is a 100% independent company, ranked in the ICIS Top Best 100 chemical distributors. The company, headquartered in Brussels-Belgium, is active in Asia, Europe, and North America with local teams in more than 25 countries.

Due to the increasing complexity of our logistic services and the expansion of our geographical territory, we are looking for a **Supply Chain Planner** with international experience for our entity **based in Barcelona - Spain** (Glokem). You will be part of the European Supply Chain team.

Your Role:

- Manage a well-defined product portfolio with regional accountabilities for end-to-end supply chain activities
- Perform all logistic activities fluently and efficiently, in different domains (Inbound, production, storage & outbound) and with our logistic stakeholders (supplier, transport company, operations, warehouse)
- Handling of incoming goods from our worldwide suppliers (process, monitor, communicate, act & react)
- Instruct & manage transport of packed and liquid (petro-) chemicals by tank truck, iso container, vessel, railcars etc.
- Plan & manage value added logistics (VAL) such as mixing, repacking, drumming, etc..
- Ensure timely delivery to customer, based on the customer's requirements
- Choose transport partner based on the agreements between Novasol and the preferred partner, selecting most competitive and attractive supplier for the requested criteria
- Maintain good relations with external service providers (3PL, operations, trucking, customs,...)
- Process Supply Chain data in the ERP and communicate within the company
- Deal with customs clearance matters & documentation
- Assist in logistic related complaints handling
- Deal with crisis management and coordinate it (fast, clear and detailed communication to all stakeholders)
- Communicate & analyze risks with the team leaders
- Assist in Supply chain meetings, exchange of information & bring up ideas for improvement

Your Responsibilities:

- Have a deep knowledge of the Novasol supply chain procedures and its related software
- Ensuring a perfect service to our customers in the most efficient way at the most competitive cost
- Plan & monitor deliveries as required, following customer specific requirements
- Knowledge of the product specific requirements for transport, handling and storage of your product portfolio
- Inform different stakeholders about logistic related matters
- Check availability and price with PM/SM before confirming the specific orders
- Daily activities: work individually but interactive with the supply chain team
- The planner is the supply chain liaison between Product Management, Customer Service, Suppliers, Logistics and the various production sites.
